

David Crouse  
Auburn, AL 36830

"As the technology director of Roanoke City Schools for the last 15 years I have seen our Internet needs go from ""I hope I have dial up"" to 200 mbs.

Our district is now 1 to 1 in every grade. All of our campuses are managed wireless with our 1700 laptops on the system. We do not have textbooks we have internet delivered content and programs. We would not be able to teach and our students would not have access to the web without the internet access provided by e-Rate. "
